Web Leader lands order from Northern Ireland paper

Web Leader International (Stand 1473) announced Tuesday that Andersonstown News, from Belfast, Northern Ireland, has purchased another 4x4 colour Quad-Stack unit to add to their existing pressline.

Greater demand in colour pagination and productivity resulted in Andersonstown News production director Frank Fox traveling to IfraExpo 2006 Tuesday to sign a contract for the new colour unit, his third Quad-Stack and fourth investment with Web Leader International.

Web Press Corporation president Gary Palmer said this increases the company's Quad-Stack colour unit sales in Ireland alone to 16 and more than 200 worldwide. "The Quad-Stacks versatility is further enhanced by the success of our units capabilities to switch over from coldset to UV printing as well as being able to couple up to any other manufacturers of single-width and single-circumference presses."
