

"Particularly Pleased..."

Mark Hamilton, CEO

After overloading our 35-year-old Goss Community for years, we finally bit the bullet and built a new pressroom 30 miles away from the old one. We bought a new CTP unit and added three Quad-Stack™ units and an Atlas folder to our Goss line. The coordination was incredible as we finished building construction, installed the new CTP, installed the new Web Press Corporation equipment, moved the old Goss equipment, trained new operators and NEVER missed a press run. The Web Press Corporation installers adapted to the many challenges and brought the project in on schedule.

In the last year, we have been particularly pleased with the fast registration on start-up, which is key to our primary business of short, color-filled, quality-sensitive runs.
